

LOW MOISTURE CARPET CLEANING

# INTENSE DEEP CLEANING & DRY EXTRACTION

**Deep cleaning** is typically prescribed annually or semi-annually, depending on the traffic levels of the establishment. This is when you perform the most intensive cleaning to get the carpet as clean as possible. Normally more soil is present so you must perform multiple steps to get the carpet clean.

Prior to chemical application, dry soil removal can extract almost 75-80% of the overall soil in the carpet. It also lifts the pile and prepares the fibers for chemical application.

The Crystal Cleaner loosens the dirt from the carpet fibres, the dry cleaning compound absorbs the soil like millions little sponges. After removing the dirty compound the carpet is ready to use immediately.

Remove dry soil, lift carpet pile.

Prespray **Crystal Cleaner**, sprinkle **carpet cleaning compound**.

Brush-in **compound**.

Pick up soiled **compound**.

## INTERIM CLEANING WITH CRYSTAL CLEANER

**Interim cleaning** is ideally done a few times in between deep cleanings. For example, if you normally deep clean once per year but sustain enough foot traffic to warrant more cleanings, you can prescribe quarterly interim cleanings that only address the high traffic areas and keep the appearance level acceptable. This will keep the carpet looking great throughout the year. The Crystal Cleaner loosens and encapsulates soil from the carpet fibres. This process also extends the life of the carpet by removing the dry soil more often.

Remove dry soil, lift carpet pile.

Spray **Crystal Cleaner**.

Brush-in **Crystal Cleaner**.

Pick up encapsulated soil.

## ADVANTAGES

*no furniture removal  
no drying time  
immediately usable  
no water marks  
no restdues  
increases lifetime of a carpet  
saves time and money*

## APPLICATION SPECTRUM

*deep cleaning  
interim cleaning  
partial cleaning  
dry soil removal  
dry extraction  
pile lifting  
encapsulation  
low moisture and dry cleaning*

Only clean soiled areas:

-  main traffic lanes
-  accumulations of dirt
